Engine

Our highest horsepower engine ever released in an XTV chassis, the VX Series, 4-stroke EFI big block v-twin engine is an absolute brute when conquering every terrain imaginable. Capable and proven for both recreation and commercial applications, the VX 950 delivers consistent and reliable performance in all temperatures and climates.

Argo Progressive Steering (APS)

Operated in conjunction with the Admiral transmission, APS adds a spring element between the handlebars and the brake system to deliver a progressive, dual-rate steering system that results in an easier, smoother turning motion that instills driver confidence while offering improved steering.

Huntmaster Package

Dressed in TrueTimber® Prairie Camo and equipped with a top mounted hoodrack, reinforced brushguard and heavy-duty 3,500 lb. winch, the Aurora Huntmaster is ready to roam the backcountry as the ultimate hunting partner.

Transmission

The ODG admiral transmission uses a sophisticated gearing system and dual differentials located on the output shafts. The braking force is applied to a steering differential vs. to the output shafts, translating into smoother and gentler steering.

Airlock™ Wheels with Low Pressure Tires

Innovative ARGO AirLock™ rims allow for lower tire pressure providing a 30% smoother ride. Paired with the low pressure XTV tires, an astonishing 1.5-psi tire pressure is achieved for a smoother, more comfortable ride over unruly terrain.

ITDS & ITC

The ARGO Instant Torque Drive System (ITDS) delivers dramatically improved performance by coupling the trusted ARGO Instant Torque Clutch (ITC) with the bulletproof Admiral transmission to deliver increased acceleration and enhanced torque.

All Terrain Amphibious Body

The one-piece, high-density polyethylene (HDPE) lower body is ARGO's signature design feature. The smooth and durable underbody floats over potential snags, stumps and outcrops as well as wetlands and water courses, keeping water hazards out while delivering unparalleled stability and control.
